

Skyjacker® LeDuc Series Features & Benefits

- Direct bolt on
- Returnable to stock
- Adjustable ride height
- Increased articulation
- Adjustable secondary spring rate engagement
- Vehicle specific tuned shocks
- Improved stability
- Optional air bump stops
- Made in the USA
- Lifetime guaranteed coil spring

2015 Off-Road Motorsports Hall of Fame Inductee

Skyjacker® is proud to announce our new bolt in Skyjacker® LeDuc Series coil-overs that are tuned and tested by Curt LeDuc with application specific valving for maximum performance on and off-road. This new series of coil-overs can be purchased as kit or just get the coil-over box upgrade for your current Skyjacker® Suspension!

JK

With diversity in New Jeep ownership it is no surprise to find Jeep Wrangler JK is sporting a softer rate spring for a softer ride. With this Skyjacker® has created Softride® Coil Kits to maintain OE ride of newer models while still meeting the challenges of off-road terrain of the preceding still available Rock Ready® Coils.

Softride® Coil Kits can still be outfitted on older models to offer the benefits and advantage the superior ride when lifted. Skyjacker offers Softride kits with every available shock option, Hydro, Nitro Gas, Black MAX and M95 Series Monotube with its advanced seal technology for leak down protection you cannot find anywhere else.

Rock Ready® Coil Kits highRear Earlier OE match spring rate is a great choice for any year model with additional weight of bumpers, body armor, skid plates and winches assisting in maintaining lifted height and superior off-road ride

JK60LAK-SX

Skyjacker® Rock Ready® ball joint load distribution design

The Skyjacker® Rock Ready® ball joint design shares the load between both the lower and upper ball joints significantly lengthening the life of both joints.

The OE ball joint design consist of a weight carrying lower ball joint and a follower upper ball joint. In this design the lower ball joint carries the full weight and road force of the Jeep and the upper ball joint is only a pivot point that controls lateral movement.

Upper Ball Joint, USA-made tapered roller bearing carries axial and radial loads. Polyurethane wipe seal prevents contamination - mounted internally to prevent tearing and friction between knuckle and ball joint face

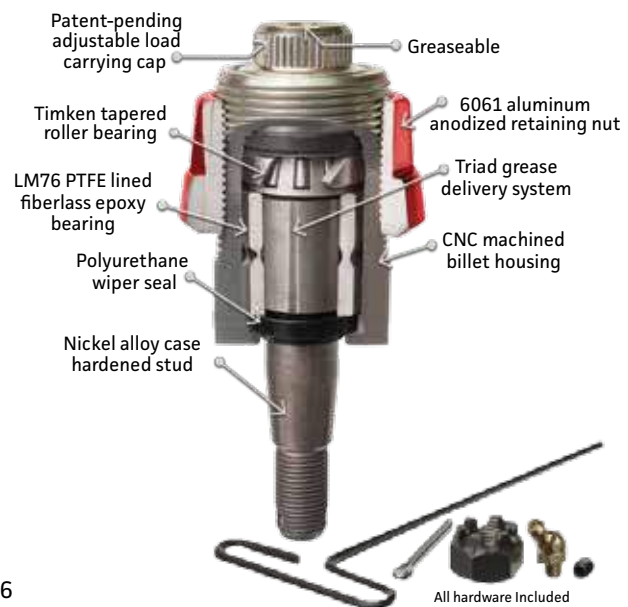

Lower Ball Joint, HEXAD Grease System - 6 equally spaced grease grooves evenly distributes grease; With every turn of the wheel, grease is spread in between the two wear surfaces

32MM powdered metal bearing replaces the undersized OE plastic bearing, increasing load carrying capacity

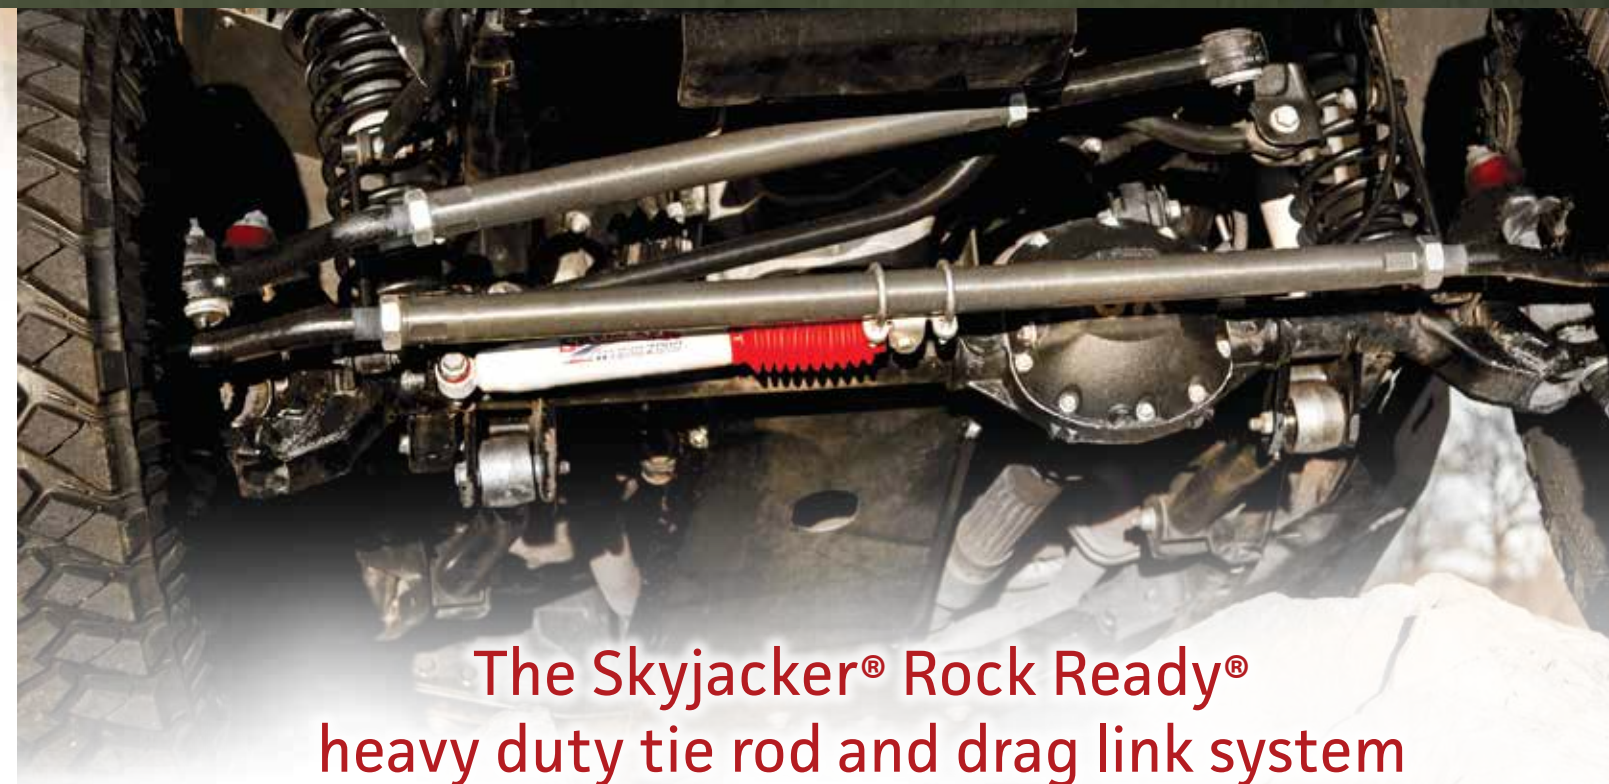

Allows clearance for RCV axles without modification

MADE IN THE USA

Heavy Duty Load Carrying Upper Ball Joint

Heavy Duty Lower Ball Joint

The Skyjacker® Rock Ready® heavy duty tie rod and drag link system

The Skyjacker® Rock Ready® heavy duty steering system for all Jeep Wrangler JK models features 1 3/4" diameter .281 wall 1026 DOM tie rod and drag link tubes, 1 1/4" threaded forged steel greasable tie rod ends, as well as a new steering stabilizer bracket. The massive tie rod cartridges thread into the tie rod end body, so they may be replaced without purchasing the entire rod end which saves cost. The same threaded tie rod cartridge is used at all 4 points so only one spare would have to be carried. Tie rod and drag link tubes feature wrench flats machined into them for ease of adjustment. This unit is a direct replacement for the OEM parts. No modifications or machining to any part of the vehicle is necessary. Tie rod and drag links can be purchased as a set or individually.

If a flipped draglink is desired, the tie rod cartridge may be unscrewed from the rod end body and screwed in from the other side. **NOTE: Flipping the drag link will require retapering the tie rod end hole from the top side of the knuckle.**

MADE IN THE USA

TJ

Skyjacker has the right combination in suspension, the lift, the look and the performance all at the right price. Not sure how extreme to go, limited budget no worries. Make your economical choice without sacrificing quality and upgrade later with Skyjacker long arm upgrades and control arm upgrades.

YJ

2" and 4" Systems These versatile Systems consist of front and rear Softride® multi-leaf springs and e-coated U-Bolts. The 4" features rear track bar brackets. The 2" and 4" systems are the perfect lifts for the less extreme off road driver. Complete your YJ today by ordering one of these versatile systems.

2.5" and 4" Military Wrap You will want to utilize the performance of the Double Military Wrap Leaf Springs to gain torque control, main leaf protection and exceptional ride quality. These durable, long lasting units have larger spring eyes at both ends. These larger eyes contain larger bushings designed for strength & longevity.
